Silver Chain

Need support in connecting with health services?

Our free service comes to you.

Primary Care at Home

Primary Care at Home is a **free** service that connects you to health care you need to feel better. It's available all over Perth from Two Rocks to Pinjarra and east to Wooroloo.

How we will support you

A Silver Chain Nurse Practitioner (an expert nurse) will visit you wherever you feel comfortable. They can:

- > do a health check up
- > refer you to other services like mental health or physio
- > prescribe and help manage your medicines
- > arrange medical tests, explain medical jargon and test results
- > help you to take back control of your chronic disease
- > support and guide you in making a plan to keep you healthy

We'll help connect you to a doctor and support you in staying on track.
